
COMPANY NEWS

C. H. Reed, Inc. has been awarded a pending **PATENT** number by the United States Patent and Trademark Office (USPTO). The title of the invention is:

“Automatic CARC waterborne or water based paint or coating batch mixing apparatus.”

The listed **inventor** of this system is Jon Bredbenner who has done an admirable job of defining and meeting the requirements of the US Military for their new Mil Specs. We are extremely thankful to Jon for this accomplishment and hope you will join us in recognizing his efforts.
